

## American Lutheran Church technical offerings and recommendations:

---

We at American Lutheran Church welcome you and are here to make your use of our technical facilities as worry free as possible. To that end, we are listing what technical equipment we have, and what you need to be able to connect and utilize that equipment. By reviewing the requirements below, we can ensure that your event will go as smooth as possible. Thank you!!

### Video Recording:

*Video recordings can be a nice way to capture an event*

---

#### Church recommendation:

- For the best experience we recommend you bring your own video camcorder and equipment for recording.
- If you need to utilize the churches video recorder, you will need to bring a CLASS 10 SD card.
  - A 64 GB SD card can be purchased at the church for \$25

#### Our equipment:

The church has a stationary camera on a tripod that is in the balcony of the church. This camera can only utilize Class 10 SD cards and is setup to record in standard definition (SD).

### Connecting to our Projector:

---

The church has a projector system for presenting pictures and video in the front of the church.

#### Church recommendations:

- You will need to bring your own device if you wish to connect it to our projector
- The device you bring will need to be able to connect to a HDMI connection

### Playing Music:

---

The church has a sound system for music and microphones

#### Church recommendations:

- You can bring a CD/DVD to play music selections using our sound system
- You can have music on your laptop and play using the HDMI connection (the same one to connect to the projector)

### A note about the internet:

---

We do not allow outside devices to connect to our network, please be sure to have all files including videos, music, and photos downloaded prior to your arrival, or have your own internet access (like using a cell phone as a hotspot). You are responsible for any data you use.
